

## ISLAND GETAWAY DECK

Exterior Deck Railing  
Davis Island, Connecticut USA

L-62

This beautiful Connecticut island home chose Banker Wire's simple and elegant L-62 stainless steel wire mesh for their deck railing infill panels. A combination of stainless steel and cedar blends nicely against the Atlantic background.

The Banker Wire highly defined lock crimp wire mesh is not duplicated anywhere in the wire cloth industry. It is among the most versatile and budget friendly architectural wire mesh crimp styles and is often the material of choice for wire mesh infill panels.
