

## POTOMAC YARD PARK

Railing Infill Panels  
Alexandria, Virginia, USA

**L-3**

The linear, 21-acre Potomac Yard Park is located in Alexandria, Virginia. This area is commonly referred to as 'The Yard' due to its unique history as a rail hub for the Washington D.C. metro region and much of the East Coast. The park sports various historical markers and monuments, multi-use trail, urban plazas, play equipment, interactive fountain, as well as tennis, basketball, and volleyball courts.

Nearly 2,000 square feet of Banker Wire's L-3 woven wire mesh pattern in stainless steel was used as railing infill panels for various places in the expansive park.
