

HALE CENTER, RUTGERS UNIVERSITY

Displays and Signage
New Brunswick, New Jersey USA

S-4

The Hale Center at Rutgers University underwent a renovation that featured oversized graphics and brightly lit features to renew the University's pride and accomplishments. Stainless steel S-4 wire mesh was incorporated with the backlit lettering and logos throughout the buildings hallways. The bold and modern look of the S-4 woven wire mesh promotes a visual of strength and substance that works well with the large signage.
