

SUB ZERO SHOWROOM

Cabinetry
Miami, Florida, USA

M33-5

The luxury Sub-Zero, Wolf, and Cove showroom in the Miami Design District showcases an integrated combination refrigerator, freezer, and wine storage unit outfitted with Banker Wire's contemporary architectural wire mesh. The light touch, "Push to Open" feature removes the need for any bulky hardware allowing the beautiful, uninterrupted M33-5 wire mesh pattern to be panelized fit and trim. The M33-5 woven stainless steel zig-zag pattern works beautifully with the highly polished stainless steel perimeter and blends well with the custom high gloss plain sliced walnut cabinetry.
