

MILL VALLEY VIEW

Exterior Railing
Mill Valley, California, USA

SJD-2

From the foundation up, Rothman Construction performed a complete remodel on this residence in Mill Valley California. New deck railing with Banker Wire stainless steel SJD-2 wire mesh pattern provides a unique perimeter that creates boundary without obscuring the view of the surrounding nature and beautiful downtown San Francisco. The large pattern SJD-2 wire mesh repeat is unlike a typical mesh. The pattern repeat is meant to visually disguise the beginning and the end.
