

## BANKER WIRE MESH SPARKLES IN AUSTRALIAN DOMAINE CHANDON RESTAURANT

Three of the Company's Wire Mesh Patterns Stand Out in the Luxurious Space

**MUKWONAGO, WI — JUNE 13, 2018** — Recently completed on a picturesque winery in Yarra Valley, Victoria, Australia, the new Domaine Chandon restaurant showcases an interior conceived by cross-disciplinary design practice Foolscap Studio, and utilizes three of Banker Wire's woven stainless steel mesh products in a variety of applications throughout the space. The overall design aimed to incorporate both the aesthetics of the industrial wine-making process as well as a refined finished look that spoke to the decadence of the product being served.

"Banker Wire provided a sophisticated woven mesh solution, which is manufactured of highest quality and perceptible up close," says Madeline Freeman, interior architect of Foolscap Studio. "We found that the quality and hand woven appearance of architectural mesh, for interior applications is not available from an Australian company. We were after a mesh that was both industrial yet refined."

In order to achieve this harmonious balance between delicate details and hard metal, Foolscap Studio selected Banker Wire's S-15, S-32, and S-30 products for their variety in size and weave, and played with a layered, considered application, installing them in key visual points of the cellar door. The large S-15 mesh was utilized along the stairway surround for depth and visual intrigue; the slightly tighter S-30 mesh was specified for the tasting room's bi-fold doors for a semi-private feel; while the tightest weave, S-32, was used in the cabinet doors behind the bar that reveal the enticing silhouettes of Domaine Chandon bottles just beyond the guests' reach.

"The three-dimensionality of the woven metal mesh catches the light, throwing it back into the space, and enhancing the sense of drama, luxury and bespoke craftsmanship, themes key to the conceptual narrative. Each of the three products are strategically placed. Creating a theatrical backdrop either for the product, or for guests as they enter and navigate the cellar door with Chandon champagne in hand." adds Freeman.

### About Banker Wire

Banker Wire is the world's leading manufacturer of woven and welded wire mesh for architectural and industrial applications. With the most modern and productive mill in the U.S., Banker Wire provides custom-weaved material for any aesthetic on any scale – from intricate design highlights to expansive building facades. State-of-the-art grid welding equipment provides a wide variety of wire alloy, spacing and diameter configurations, trimmed or untrimmed. Founded in 1896, Banker Wire's manufacturing expertise has been refined for more than a century, bringing unmatched customization, quality, and service to customers. For more information visit [www.bankerwire.com](http://www.bankerwire.com).

### About Architectural Woven Wire Mesh

Pre-crimped woven wire mesh is constructed of individual wires that are crimped prior to being woven together on a loom. Pre-crimping the wires provides a much higher degree of control during the weaving process. This allows for far more intricate and interesting patterns, as well as unique customization, to meet the vision of the designer. Banker Wire has refined and innovated its crimping process more than any other manufacturer, delivering more than 8,000 different spacing, diameter, and crimp combinations, plus endless customization options. As a result, Banker can make any woven wire mesh pattern imaginable – manufactured to specify for any project type.
